

Distance Learning Privacy, Security and Safety

Davis Joint Unified School District is committed to student safety. Below you will find information on what we are doing to secure student privacy. If you have seen or heard of a student violating any of these privacy and security policies, please contact your school's principal or teacher.

Cisco Webex

- DJUSD Students do not have Webex accounts. To protect student privacy, DJUSD does not share student account information with Cisco.
- Students enter their first and last name followed by their school email address.
- Video Capturing
 - Teachers may record their classroom sessions. If you have concerns with your child's voice or image being recorded, please [notify your school's Principal](#).
 - All recordings are uploaded to [Cisco's ISO 27001 certified](#) cloud storage.
 - See more information about data privacy on [Cisco Webex's website](#).
- DJUSD Virtual Classroom Security
 - Webex Meetings require strong passwords with a minimum of 8 characters.
 - Default DJUSD Webex Meeting settings:
 - Students cannot:
 - view, save or print a file or document (use Google Classroom).
 - annotate (turn this on if you are using a whiteboard).
 - view the participant list.
 - request to control shared content.
 - private chat with other attendees.
 - join the meeting before the teacher joins.
 - Students can:
 - private chat with their teacher (The session's "Host" and/or "Presenter").
 - turn on/off their microphone or camera.

G Suite (Google)

- Google for Education (G suite) is [transparent about data collection policies](#) and follows [FERPA](#), [COPPA](#), as well as all [California Privacy Laws](#). Visit the [Google for Education website](#) for information on Google's privacy practices.
- During Distance Learning, students are expected to follow our [DJUSD Student Use of Technology](#) agreement.
- While DJUSD data is stored on Google's servers, they do not own DJUSD data. Google's systems are among the industry's most secure.
- You can find more information about G Suite for Education privacy [on their website](#).

Gaggle Safety Monitoring of G Suite

- Gaggle is a safety management tool used by DJUSD. Gaggle monitors all student activity in G Suite (Google Drive, Docs, Slides, Gmail, Google Classroom, etc.) 24 hours a day, 7 days a week. Gaggle sends alerts to students and staff when there are any detected concerns around student safety, self harm, depression, criminal activity, bullying, etc. If urgent or immediate concern is detected, staff or law enforcement is notified around the clock.
- You can find more information at [Gaggle's Safety Management website](#).

DJUSD Chromebooks

- All DJUSD Chromebooks use the same filters whether used in a home or at school.
- The same limits and permissions apply, and student activity is filtered to age-appropriate content and access.

- You can find more information about Chromebook security and privacy on [Google's website](#).
